Seasoned Frontend Engineer, Graphic Designer, and Musician

I am a seasoned professional who has deployed countless products, solutions, and integrations in both B2B and B2C domains. After serving as Vice President at Highland, I took an IC position at Output, Inc. because I decided **life is too short to not work at a music company**. I love frontend engineering and my BFA in Graphic Design gives me a unique set of perspectives on the discipline of web development. If I'm not developing for the web I'm likely producing music.

Experience

Output, Inc.

2022 - Today

Senior Web Engineer

Responsible for building and maintaining Output's extensive portfolio of web applications. My daily work involves a mixture of: TypeScript, Vue, Tailwind, SCSS, mobile-first design implementation, e-commerce, payment gateways, micro-services, APIs, checkout flows, account pages, landing pages, implementing marketing analytics, builds, deployments, tooling, automated testing, and data migrations. I regularly participate in code reviews, pairing, and mentoring. I also serve as a technical lead for epics.

Northern Information

2008 - Today

Artist

Northern Information is my blog, band, and code foundry. I regularly release open-source music software in collaboration with contributors from all over the world. Our instruments are lovingly used by hundreds of musicians.

norns study group

2020 - Today

Volunteer

The norns study group is a Discord community focused on building software for the monome norns sound computer with Lua and SuperCollider. I regularly volunteer time as a mentor, moderator, and event organizer.

Highland

2013 - 2022

Various Roles

As **Vice President**, I was responsible for managing finance, cashflow, AR/AP, HR, payroll, operations, compliance, project staffing, vendor relations, and project oversight.

As **Director, Software Development**, I was responsible

Highland (continued)

2013 - 2022

Various Roles

for directly managing Highland's developers, consulting with clients, estimating new projects, and serving on the leadership team.

As **Solutions Architect**, responsible for framing the solution approach, researching technical feasibility, building spikes to reduce risk, and creating estimates. Once projects were underway, I provided technical oversight and helped manage emergent complexities.

As **Senior Full Stack Developer**, I was responsible for building web applications, developer leadership, and mentoring.

Cubicle Ninjas

2011 - 2013

Senior Full Stack Developer

Responsible for building web applications, developer leadership, and mentoring.

AlphaGraphics

2008 - 2011

Graphic Designer

Responsible for prepress, production, and graphic design.

Freelance

2008 - 2011

I freelanced through college and the early days of my career. I specialized in branding and websites for small businesses.

Capabilities

Skills

Full Stack Engineering
Visual, Systems, & UX Design
Information Architecture
Mentoring
Accessibility & Semantics
Agile Software Development
Technical & Creative Writing
Illustration
Workshop Facilitation & Rapid Prototyping
